Axel

2005 | Gijs Papavoine

De fijn gesneden kubistische ombouw heeft een onderstel dat bijna aan het oog wordt onttrokken, waardoor de bank en fauteuil geen verbinding lijken te hebben met de ondergrond. In deze strakke ombouw ligt een veelvoud van zachte kussens gevuld met een mengsel van latex en dacron. Hiermee wordt niet alleen het comfort gediend, maar ziet Axel er gewoon uitnodigend en gezellig uit. Kwalitatief zijn hier de beste materialen gebruikt, die garanderen dat de vullingen zich na jaren nog goed houden en de vorm overeind blijft. De zithoogte is hoog gekozen om het opstaan te vergemakkelijken.

The legs under the delicately cut cubist surrounds are almost hidden from view, as a result of which the couch seems to have no connection with the floor. These tight surrounds are filled with soft cushions of a latex and dacron mixture, which give Axel not only great comfort, but also an inviting and cosy appearance. The materials are made of the best quality, which guarantees that the filling will stay in shape for many years. The height of the seat is chosen quite high in order to simplify the standing up.

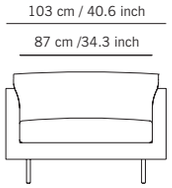

Der fein geschnittene kubische Korpus wird von einem Gestell getragen was dem Auge etwas entrückt ist, dadurch entsteht der Eindruck als währe keine Verbindung zum Boden gegeben. In dem geradlinigen Umbau liegen eine Vielzahl von weichen Kissen, welche mit einer Latex und dacron Mischung gefüllt sind. Diese sorgt nicht nur für einen hervorragenden Sitzkomfort, sie erzeugt auch für ein geselliges und einladendes Erscheinungsbild. Um die hervorragende Qualität erreichen zu können, wurden nur die besten Materialien verwendet. Diese garantieren auch noch nach vielen Jahren für ein gepflegtes Erscheinungsbild. Das Aufstehen wird durch eine normale Sitzhöhe gewährleistet.
